

# NEW REPAIR & SYSTEM TEST CAPABILITY

## REXROTH / HYDRAMATIK BENT AXIS PUMP

*Technical Bulletin*

This is a Rexroth / Hydramatik A7V-250 series bent axis pump. This is a piston pump, variable volume, and servo controlled. This pump is 250 cubic centimeters per minute or 77.6 gallons per minute maximum flow. This pump is also good for 5,000 PSI. It also employs positive yoke stops. This is a fairly special pump. These are not real common units however, there is a good population of these units in operation. You can find these pumps with flows to 125 GPM..

Rexroth is a very reliable product and one of few manufacturers that produce 5,000 PSI units as standard product lines.

**12 Month In-Service Warranty**

**All Units Are System Tested**

**No Charge Evaluation**
